Legislative Decree No. 8 of 31.1.1971

The Third Five Year Plan

The Head of State,

In accordance with the provisions of the provisional Constitution, and

In accordance with the Council of Ministers' Order No. 8 of 30.1.1971,

ENACTS as follows:

Article 1

The Third Five Year Plan for Economic and Social Development as set out in the annexes appended to this Legislative Decree shall be approved as a basis for economic and social development in the Syrian Arab Republic over the period from 1971 - 1975 and all the activities of Ministries, Administrations, People Organisations and all competent Authorities shall be oriented for the realisation of the objectives of this Plan.

Article 2

Ministers shall be held responsible, each within his sector, for the introduction of the necessary measures for the implementation of the objectives of this plan in accordance with the laws and regulations in force.

Article 3

Directors and all administrative authorities, boards and committees of establishments, cooperatives, companies and economic, social and administrative organisations shall, within their respective powers vested in them by the laws and regulations in force, be held responsible for the impelementation of their respective establishment plans under the Third Five Year Plan and shall secure the realisation of the objectives of the said Plan.

../..

Article 4

The State Minister for Planning Affairs shall in consultation with the competent authorities lay down the productive and development sectorial plans, their details, time table and various estimates. These estimates shall be considered an integral part of the Plan.

Article 5

Expenditures on development projects may be outlayed within the limits of their overall cost estimates in the Third Five Year Plan for Economic and Social Development provided that the outlays during the fiscal year shall not exceed the appropriations in the annual budget (annually budgeted appropriations).

Article 6

Competent authorities shall be prohibited from implementing development projects outside the framework of the Plan.

Article 7

The State Minister for Planning Affairs shall lay down the necessary instructions for the implementation of the provisions of this Legislative Decree.

Article 8

This Legislative Decree shall be published in the Official Gazette and shall come into force with effect from 1.1.1971.

Damascus, 31.1.1971

The Head of State

Ahmad Al-Khatib

GENERAL
OBJECTIVES

Annex 1

A - General Objectives

Article 1

The general objectives of the Third Five Year Plan for economic and social development (1971 - 1975) shall be defined as follows:

1 - To arrange for the firm establishment of the material bases of economic and social development of the Syrian Arab Republic through a full mustering of all productive potentialities for the battle of liberation.

2 - To substantiate Syria endeavours to realise full Arab unity through the development of Arab economic integrity, coordination of economic and oil policies, encouragement of joint Arab investment schemes and the development and liberation of Arab economy from subordination to foreign economy.

3 - To realise economic and social development of Syria within the frame work of a unified socialist Arab society, to establish a firm deep ground for the contents and measures of socialist transformation which have been completed whereby the freedom and dignity of the citizen would be secured and the principle of equal opportunities would be realized to all citizens, the principle of justice and equity in distribution income would be maintained and monopoly and exploitation would be continuously abated during the transitional period prior to the establishment of a unified socialist Arab society.

4 - To modify the structure of national economy for the establishment of a developing industrial agricultural economy that would be a strong starting point for the realisation of continuous self-development and to arrange for the increase of the net geographical income at the rate of 8.2 % per annum to double our national income within a maximum period of 9 years.

5 - To arrange for an optimum utilization of our water resources, agricultural land and manpower to shore up the supports of irrigated agriculture and to increase and diversify the agricultural and animal production and to realise intigrity between the two through the adoption of modern agricultural methods, the intensification of machines fertilizers and selected seeds and the introduction of crop patterns in addition to the training of labour and the completion of cooperative organisation.

../..

6- To expedite the execution of the Euphrates Project and to arrange for material, manpower and regularity development for the utilization and development of the land to be irrigated.

7 - To arrange for the completion of the construction of industrial through development, modernization of existing industry and the introduction of such industries that would enable us to utilize our natural and agricultural resources with special emphasis on producer goods, and to arrange for optimum utilization of the possibilities to construct industrial units of an ideal volume to place us in a better position to participate in the common Arab market and to realise Arab unity.

8 - To arrange for an optimum utilization of all potentialities inherent in the geographic position of Syria through concern with the development of the means of international communications and to restore to our country the historical role entrait in the area and for the utilization of the possibilities of our country in transporting oil from the Arab Gulf to the Mediterranean.

9 - To coup with scientific progress and technological revolution, especially in the fields of basic production and to substantiate and to take such measures that would secure our scientific and technical potentialities and utilization of our intelectual faculties and experiences and promotion of the full scientific revival and elimination of apparent and latent unemployment.

10 - To pay great concern to the country-side especially in remote Muhafazat, for the improvement of the standard of living and the productive potentialities through the provision of fundemantal public services, the introduction on a wider scale of rural industries to increase the opportunities of employment and to lessen the immigration of villages to city.

11- To arrange for the diversification and increase of export of processed commodoties through the orientation of investment towards the production of commodoties for export and such other commodoties in replacement of exports, the development of our economic relations with Arab and friendly countries and the sale of our products in foreign currency to meet the requirements of development and defence.

../..

12 - To arrange for the development of internal trade whereby balance and equilibrium between such trade and the branches of national economy and coordination between consumption and production on the one hand and consumption and external trade on the other hand would be realised through gradual control of whole sale trade and a greater role for cooperatives as a support to public sector, and for the development of pricing system as an economic stimulant and incentive, with a view to meet the needs of the masses in such appropriate quantities, specifications and prices and in due course that would be congenial to their standard of living and would secure the participation of internal trade in the continuous development of national economy.

13 - To promote the standard of educational, medical, cultural, social and housing services, to develop administration procedure, to adopt scientific principles and socialist experiments and to provide social security to all.

14 - To develop and support people organizations and creative initiatives and to make available all possibilities for their participation in economic and social development.

Article 2

The objectives of the development of the fundemantal economic variables over the period 1971 - 1975 shall be defined as follows:

a) Net Geographical Income:

- The rate of net geographical income shall be fixed at 8.2% per annum; the net geographical income in 1975 will rise up to 148.3% as compared to the figure in the basic year.

- The rate of net geographical income from consumer goods sectors shall be fixed as follows:

  - agriculture 5.1%
  - industrial 15.8%
  - Construction 11.5%

../..

b) Public Consumption

- The rate of consumption increase shall be fixed at a maximum of 8% per annum; this consumption will rise in 1975 to 147.00 % as compared to the figure in the basic year. This will serve to meet the needs for the battle of liberation and the expansion of the necessary services of the citizens.

c) Private Consumption

- The rate of private consumption increase shall be fixed at a maximum of 6.8% per annum; the consumption will rise in 1975 to 138.8 % as compared to the figure in the basic year. This will serve to promote the welfare of the citizens.

d) Total Consumption

- The development of average consumption as compared to average income of 87.1% in the basic year shall be fixed at 82.6 % in 1975. This will serve to increase the volume of savings.

e) Local Savings

- The rate of local savings increase shall be fixed at such a figure of not less than 14.8% per annum; savings will rise in 1975 to 199.3% as compared to the figure in the basic year and the average of total geographical income fixed at 12.9% in the basic year will rise in 1975 to 17.4%.

f) Import

- The rate of the increase of commodities and services import shall be fixed at 5.00 % per annum. Imports will rise in 1975 to 127.6% only as compared to the figure in the basic year

g) Export

- The rate of the increase of commodoties and services export shall be fixed at such a figure of not less than 6.5% per annum; exports will increase in 1975 to 137.00 % as compared to the figure in the basic year. This will serve to reduce the deficit in foreign trade and to meet the needs for development and defence.

../..

h) Investments

- To achieve the increase in the net geographical income fixed at 8.2% per annum, the rate of increase of total investments shall be fixed at 10.7% per annum; this will rise in 1975 to 166.5% as compared with the figure in the basic year.

i) All necessary measures shall be taken to employ manpower in productive and service works; the number of employed persons will increase by 4.7% per annum and the output per worker will rise to 3.3% per annum.

Annex 1 - B

Sectorial Objectives

Article 1

The objectives of the economic sectors shall be defined as follows:

I - The objectives of the Euphrates, irrigation and agriculture

a) **The Euphrates**

The objectives shall be:

1 - To supply an electric power, 300 000 KW

2 - To complete the construction of the dam by the end of 1975.

3 - To complete the pilot project, area 17 600 Hectares. This will serve as an experimental field for various agricultural experiments which will be introduced to all Euphrates project land.

4 - Reclamation of an area of 38 700 Hectares and the construction of the necessary irrigation and drainage canals, besides the employment of an additional number of workers estimated at about 53 000 workers over the five year plan.

b) **Irrigation**

The objectives shall be:

1 - To study the water basins so as to determine the volume of underground water, the possibility of utilization and relation with surface water.

2 - To improve and modify the courses of Barada, Awaj, Jagh-Jagh and Khabour

3 - To improve the methods of the utilisation of available irrigation water through the construction of irrigation and drainage systems.

4 - To construct the necessary desert water wells for sheep.

../..

5 - To raise the area of irrigated land from 495 000 Hectares to 550 000 Hectares.

6 - To complete the present irrigation projects and to make arrangements for full utilization.

7 - To drain marches and to convert them to Arable land, and to construct small and medium size dams.

c) Agriculture

The objectives shall be:

1 - To concentrate efforts for the development of agricultural and animal products characterized as being a main foodstuff or a raw material for local industry or for export or for replacement of import or covering relatively a large area.

2 - To raise the productivity of work through training, apprentice, extension and the employment of agricultural machines, equipment and selected strains from LS 1075 in the basic year to LS 1200 by the end of the Five Year Plan.

3 - To arrange for the optimum employment of manpower to reduce latent and sessonal unemployment by increasing the agricultural labour from 1170000 workers in the basic year to 1340000 workers by the end of the Five Year Plan.

4 - To arrange for the rise of land productivity from LS 377 per Hectare in the basic year to LS 465 per Hectare, without increasing the area cultivated in the basic year and the last year of the five year plan, 6100000 Hectares.

5 - To support agricultural cooperatives, to provide their needs, to adopt this sector as the corner stone for agricultural production and to arrange for the formation in all villages of productive cooperatives and service cooperatives with priority in the course of implementation to dense agricultural areas and animal husbandry, through an arrangement for the rise of the number of cooperative society from 1600 in the basic year to 4500 by the end of the Five Year Plan, allowing for pilot cooperative societies for the implementation of development methods and procedures.

../..

6 - To arrange for the establishment of at least 2 state farms in each Muhafaza for the implementation of the development methods and procedures under the Five Year Plan for pilot area and for carrying out experiments and research works.

7 - To adopt the policies of organization and material incentive as fundemental means to achieve the integral objectives of the Plan.

8 - To develop agricultural scientific research to serve the objectives of development and to increase the number of agricultural specialists as follows:

	Basic Year	Last Year of Plan
Agronomist	760	1744
Agricultural Supervisor	769	3719
Veteranian	37	89
Veterinary Supervisor	219	559
Agricultural Assistant	-	900

9 - To arrange for the rise of the volume of agricultural loans from 330 Million Pounds Syrian in the basic year to 500 Million Pounds Syrian by the end of the Plan, with due observance of the following:

- Increase of loans to cooperative and public sector.
- Increase of medium and long term loans with priority over short term loans.
- Increase of loans in kind with priority over cash loans.
- Correlation of loan policy with the objectives of production and investment policy.
- Enlargement of the agricultural specialists machinery in the agricultural bank and support of these specialists.

10 - To develop and arrange for higher employment of agricultural machinery in agricultural services through the construction of a plant for tractors in Aleppo

../..

with an output of 2000 tractors per annum and the construction of agricultural machinery stations for the service of agricultural machinery.

11 - To improve the method of Cereals storage through the construction of 11 silos and three seed distribution centres and one concentrated fodder plant.

12 - To arrange for the expansion of oil yielding crops by developing vegetable oil industries.

13 - To encourage and develop bee and cocoon breeding through the adoption of modern methods.

14 - To introduce fodder crops in crop patterns.

15 - To develop the productivity of Akshi and Julani beef cattle by cross-breeding with unilateral higher yielding types.

16 - To secure veterinary services and to introduce on a wild scale artificial insemination.

II - The objective of the public Industrial Sector

The objective of the Plan shall be to promote the public industrial sector through expansion, modernization, development of the quality of products, higher utilization of potentialities and the skill of personnel and the arrangement for correlation with the economic needs of sectors in the country through such measures:

1 - To increase the quantity to meet the ever increasing demand in local or world market and to decrease the import of certain commodoties and replace them by local products.

2 - To improve the quality to be in conformity with world specifications.

3 - To expand local products processing instead of their import as raw materials.

../..

4 - To arrange for the development of existing establishments to coup with modern technological development through equipment with the necessary laboratory instruments to have a strict control of the quality of products, and to initiate training units in establishments and to provide the necessary staff.

5 - To arrange for division of labour through the initiation of new specialized divisions and for coordination between the products of the present units.

6 - To raise productivity through the employment of potentialities, totally or partially out of order, to raise the standard of training, to minimize as far as possible the waste of materials and to have optimum benefit of working hours.

7 - To substantiate the principle of moral and material incentive and labour for the promotion of production.

8 - To reduce cost to the minimum possible through the development of the present establishments into economic units and benefit from experiences and studies in this field.

9 - To raise the output of yarns by 28000 tons and to arrange for the rise of the thickness of the thread from 18.87 to 20 (English measurement). This will serve gradually for the processing of 50% of our cotton.

10 - To arrange for the cleaning and preparation of 2000 tons of local wool instead of export as a raw material.

11 - To double the production of woolen and mixed threads through expansion and development of the average benefit from present productive potentialities.

12 - To double the production of artificial threads.

13 - To increase the production of cotton textiles by 50% as compared to the figure in 1970.

14 - To arrange for a partial production of lady cloth instead of the production of woolen and mixed cloth with an increase of the present productive potentialities.

../..

15 - To arrange for the improvement of the quality of silk products and for coordination in this respect between the public sector and the private sector.

16 - To double the production of mechanical wool carpets and to maintain their good quality.

17 - To increase the production of silk carpets by 50%.

18 - To arrange for the production of a sufficient quantity of blankets to meet the needs of the local market, allowing for export.

19 - To increase the production of under-wear by 50% and to promote quality.

20 - To arrange for the introduction of ready-made clothing into the public industrial sector.

21 - To arrange for the improvement of the quality of cotton and gauze for medical purposes and to have an optimum utilization of the productive potentialities.

22 - To double the production of cement to meet the needs of construction works in various sectors . Production will rise from 909000 tons in 1970 to 1800000 tons in 1975.

23 - To increase the production of cables to meet the needs of the country and to dispense as far as possible with import.

24 - To increase the production of matches to meet the needs of the local market.

25 - To arrange for the expansion of the volume of bycicle tires, bycicles being the popular means of transport for a great number of citizens in the Syrian Arab Republic.

26 - To arrange for the expansion and increase of the local manufacture of refrigerator spare parts and to arrange for the rise of refrigerator production from 18000 in 1970 to 30000 in 1975.

27 - To develop and improve glass and porcelain industry through the construction of new furnaces and the provisions of equipment to meet the ever increasing demans and to improve quality.

../..

28 - To increase the production of foot wear and to improve quality so as to put an end to smuggling This will serve to coup with the development of consumption.

29 - To improve cotton seed pressing mills so as to raise the output from 13% to 16%

30 - To arrange for the use of cake with high nuitrition value as fodder.

31 - To have full coordination with the agricultural sector to cultivate barley straines for the beer industry, to arrange for the operation of Aleppo barley roast house with full capacity, to construct a new beer plant in Damascus where consumption is high, as well as coordination with the agricultural sector to provide the necessary quantities of sugar beet root to meet the needs of the sugar plants.

32 - To arrange for the expansion of yeast and tinning industry.

33 - To arrange for converting the residuce of technical slaughter houses into fodder.

34 - To arrange for the processing of vegetables and fruits as baby tend food and the export of a quantity of this food.

35 - To develop hydrated oil industry and to promote the quality standard.

III - The Objectives of Power and Fuel Sector

a) Crude Oil

The objectives of the Third Five Year Plan in the field of crude oil resources shall be:

1 - To complete exploration all over the country through available methods and means in search for oil beds to increase the reserve by:

../..

- Carrying out a detailed geological survey of land and soil composition with an acurate apparatus, involving an area of about 5509 square kilometers.

- Carrying out a gravity survey of an area of about 10000 Sq. Km to complete the survey of the remaining area and re-survey of areas already surveyed, especially those areas in which the Syrian Petroleum Company Limited carried out operations.

- Carrying out ceismic survey, refrective method, distance 4487 Km, and reflective method, distance 15260 Km.

2 - To expand the exploitation of the present oil wells and to develop the new wells and to arrange for the exploitation of such wells by:

- Drilling to a depth of 109500 meters in 30 prospective wells in various areas.

- Drilling to a depth of 631500 meters in 337 wells: 50 wells at a depth of 700 meters in Jbeisi, 32 wells at a depth of 3500 meters in Jurassic and Triassic strata at Sweidieh, Karatchoc, Rmeilan and Jbeisi, and 255 wells at a depth of 1900 meters in massif strata in Swidieh, Karatchoc and Rmeilan.

- Production of 85 Million Cubic Meters of crude oil from Sweidieh, Karatchoc, Rmeilan and Jbeisi fields in all strata over the five years.

3 - To raise the throughput of crude oil pipelines to meet the ever increasing transport need.

4 - To arrange for the expansion of Syrian crude oil refining to meet local consumption of oil products, to improve the products so that they would be suitable for other industries through the construction of a new refinery, capacity two million tons and the operation of this refinery with all ancillaries before the end of the Third Five Year Plan.

5 - To intiate auxiliary industries around the refinery such as oil mixing and production plant, barrel manufacture and repair plant and grease and asphalt

../..

plant etc... for:

- Mixing a quantity of basic oils rising from 15000 tons up to 40000 tons at oil mixing plant to meet the needs for local consumption.
- Manufacturing a number of barrels rising from 300000 barrels up to 470000 barrels.
- Repair of a number of barrels rising from 120000 barrels up to 150000 barrels.
- Production of a quantity of grease rising from 400 tons to 1300 tons.
- Production of 40000 tons of basic mineral oil by the end of the Third Five Year Plan.
- Production of oxidized asphalt at the rate of 33000 tons and emulsified asphalt at the rate of 10000 tons to meet the needs for local consumption.

6 - To increase the storage capacity of oil products to meet crises and emergancies. This serves as a reserve for local consumption.

7 - To raise the technical standard of oil industry personnel and to train new personnel through: the completion of oil trades institute for about 1000 students who will be qualified after graduation, over the Third Five Year Plan.

8 - To provide an available surplus of LS 1000 Million through oil investments in addition to the sum of LS. 1000 Million necessary for the execution of these projects, and to diversify our exports to lessen reliance on agricultural export.

b) <u>Electricity</u>

The objectives of the Five Year Plan in the field of electricity shall be:

../..

1 - To provide electric power and energy to the country during the years preceding the operation of the hydro-electric generation plant at Euphrates dam and in the first stage of its operation, for the generated power from the dam is connected with the gradual rise of the level of water storage and the volume of this charge.

2 - To raise the complex capacity from 279 Mega Watt in the basic year to 719 Mega Watt in 1975 and the energy from 815 Million KWA in the basic year to 2481 Million KWA in 1975.

3 - To provide the necessary electric net works for the transmission and the distribution of electric energy especially the energy from the Euphrates dam hydro-electric generating house.

4 - To expand the connection net work to cover most Muhafazat.

5 - <u>Village electricity:</u>

- To connect all neibouring villages net works to the main net work by 20 KV distribution lines with a view to dispense gradually with diesel engines which will be installed in other villages far from the net work.

- To instal diesel engines of the area villages far from the net work in large stations and the supply of the villages by 20 KV distribution net works.

6 - To illuminate all villages whose inhabitants exceed 2000, villages by present net works, tourist villages, summer resort villages and border villages.

7 - To continue to make uniform medium and low voltage systems in accordance with the utilization scheme.

../..

8 - To develop study and execution staff of the organization to carry out the study and execution of the projects and to dispense gradually with the services of foreign firms.

9 - To make uniform the technical regulations in all areas and to lay down uniform specifications for materials works and installations.

10 - To reduce generating, transmission and distributing cost through the adoption of the best economic and technical methods of operation, couping with technological and scientific progress and the initiation of research centres and laboratories for all voltages.

11 - To supply regular energy to consumers.

12 - To develop labour of the organization. The number of the organization personnel will be about 10000 workers in 1975. This development shall allow to raise the technical standard and the percentage of personnel with academic degrees, rise being from 4% to 6%.

13 - To raise the daily average load by encouraging industries and consumers to consume energy outside peak load hours by amending the charges whereby the charge is low at night and day and is high during the peak load hours. This is the only alternative to avoid shortage during peak load hours over the period from 1971 to 1972.

14 - To improve and develop the transmission and distribution net works so as to minimize as far as possible waste and to draw up weekly and daily operation programme whereby the best output of the power houses would be realized, and to minimize the use as far as possible of diesel engines for power generation.

../..

IV - The Objectives of Transport and Communications

The objectives of transport and communications sector shall be:

a) Roads and Land Transport

1 - To improve the present asphalted roads, especially the international roads connecting the Syrian Arab Republic with neibouring countries and continants. This improvement of the international roads aims at raising the technical standard of this system by improving about 800 Kms, which represents about 30% of the present total length of international roads.

2 - To increase the length of asphalted roads by:

a) increasing the length of international and main roads by constructing about 600 Kms of asphalted roads. This represents about 15% of the present total length of international and main roads.

b) execution of sub-roads and country-side roads to connect certain Muhafazat seats with villages and to meet certain military and tourist needs by constructing of about 350 Kms asphalted roads. This represents about 9% of the present total length of sub-roads and country-side roads.

3 - To complete the bridges over the Euphrates and to construct a bridge over Orontes river to eviate passage over Rastan dam.

4 - To initiate a vocational training centre by aids from the special funds and contributions by the Ministry of Communications.

b) Syrian railways

1 - To arrange for the extension of the regular railways by constructing 500 Kms regular railways. The length of the ordinary railways will rise from 835 Kms to 1335 Kms by the end of the Five Year Plan.

../..

2 - To carry out certain studies to construct further railways and to modernize and equip the present railways with equipment and modern express wagons.

3 - To complete certain constructions at Tartous Port and to construct a new quay on the northern side, length 800 metres and depth 4 - 11 metres.

c) Post and Tele-communications

The objectives of the plan shall be:

1 - To promote the capacity of internal post services by 4950000. This will rise from 27135000 in 1970 to 32085000 in 1975.

2 - To coup with the development of post-volume from abroad and to arrange to meet the expected increase at the rate of 2125000. The number will rise from 10185000 to 12310000 by the end of the Five Year Plan.

3 - To increase the number of automatic telephone subscribers by 60000. This will rise from 68234 to 128234 and the number of manual telephone subscribers will rise from 9996 to 13996 subscribers by the end of the Third Five Year Plan.

d) Broadcasting and Television Services:

1 - To develop all radio short waves and to raise the capacity from 90 KW to 590 KW by the end of the Third Five Year Plan.

2 - To instal a medium wave transmission set, capacity 1000 KW, Hassetche area.

3 - To instal TV stations (transmission) in Tabaqa, Deir-Ezzor, Hassetche, Khaldoun and Jabal El-Arab, capacity 10 KW each.

../..

4 - To purchase a support TV transmission set, capacity 10 to 25 Watt to cover the areas screened by natural obstables.

5 - To instal 10 radio and TV connection stations between the studios in Damascus and the transmitting stations.

V - Public utilities and Housing Sector

The objectives of the plan shall be:

a) Potable water

1 - To provide pure portable water supply and to test water conformity to the hygienic conditions at the seats of Muhafazats. This will serve to raise the number of portable water supply system subscribers from 85% to 68% by the end of the Third Five Year Plan as regards city dwellers.

2 - The objectives in relation to villages are to provide water supply to a number of municipalities and villages whose inhabitants exceed 500 where water resources are available provided that the capital cost per head per project shall not exceed LS 150 and the average production cost per cubic metre shall not exceed Piastres 60, and the search for water resources to supply villages whose inhabitants do not exceed 400 where no water resources are not available, and the improvement of water quality in such villages where water resources are sufficient but the quality is bad such as the villages on the banks of rivers, and the construction of water supply systems in such villages where water projects had been executed, whose inhabitants exceed 1000. The number of potable water supply system subscribers in villages and municipalities will rise from 45% to 55%.

b) Housing

The objectives of the plan are to meet the housing needs in part up to 1975 especially in big cities (Damascus and Aleppo) where the problem of housing is great and in the remaining towns exposed also to such a problem and in other towns.

c) Internal Transport and Machinery

The objectives of the plan shall be:

1 - To make up for the present shortage in buses to avoid aggrevation of the situation.

2 - To improve and organize internal transport services

3 - To provide the Directorates of the Ministry of Municipale and Rural Affairs as well as Muncipalities with the various necessary equipment for the execution and maintenance of their projects.

d) Planning and organization

The objectives of the Plan shall be:

1 - To elaborate a planning designs to be the basis for the study and the execution of public utilities in cities and the country such as water supply systems, sewage systems and electricity systems.

2 - To prepare a primary study for regional planning

3 - To study Djezirieh, Euphrates and Coast areas.

4 - To complete the elaboration of the planning designs for the seats of districts, areas and remaining municipalities whose inhabitants exceed 5000, besides tourist and archaeological areas. \

e) Roads, Gardens, Municipal Premises and Public illumination

The objectives of the plan shall be:

1 - Roads, gardens and play grounds

- To construct 75% of the roads, gardens and play grounds under the approved plans and to asphalt main streets and sub-streets.
- To construct 40% of the roads, gardens and play grounds under the planning designs approved up to 1970 and to asphalt the main streets and 50% of the sub-streets.

../..

- To construct and pave one main street in each town or village for which there is no planning design and to connect it with the main road, to construct one public garden, area at the rate of 2 square metres per person and to construct one playground.

2 - Public Premises

- To construct one slaughter house in cities where the number of population exceeds 15000, in addition to 5 main slaughter houses in Damascus, Aleppo, Hama, Latakia and Raqqq.

- To Construct a municipality building as a part of all government municipal departments building in cities whose inhabitants exceed 5000.

- To construct whole sale vegetable and fruit market in cities whose inhabitants exceed 20 000.

- To construct vehicle departure centre in cities whose inhabitants exceed 25 000.

- To construct a restaurant/bar in all tourist locations.

- To construct industrial areas in cities whose inhabitants exceed 40 000.

3 - Public Illumination

- To provide all streets, roads, and gardens in cities and villages with with the minimum number of lamps.

- To illuminate 30% of the main streets.

f) Sewage Systems and Medical Services

1 - To construct sewage systems in all main cities, to arrange for the utilisation of their residues and to arrange for the discharge of rain water and surplus underground water.

2 - To develop the present municipal medical services.

3 - To initiate a nucleus for medical services in towns where municipalities do not provide such services.

../..

VI - Objectives of Services Sector

The objectives of the third five-year plan shall be:

a) **Education**

1 - To initiate the amalgamation of the elementary and preparatory stages of education in a single stage called the fundamental education stage.

2 - To recruit teachers of new specialisation fields for the secondary stage to meet the needs of the development plans.

3 - To implement the principle of obligatory education in the first six years of the fundamental education stage in certain areas in various Mohafazats.

4 - Teaching Staff

- To review the syllabuses of teacher training schools and preparatory teacher training institutes to cope with world cultural, scientific and educational progress and with the syllabuses of the fundamental education stage.

- To develop a complete qualified teaching staff for the first six years of the fundamental education stage.

- To develop a qualified teaching staff for the last years of the fundamental education stage to reach a rate of 60% by the end of the third five-year plan.

- To arrange for scholarship inside and outside the country and to cooperate with the university to provide a qualified teaching staff for the general and technical secondary stage to reach a rate of 75% by the end of the third five-year plan.

- To develop the necessary teaching staff (trade instructors) for industrial schools to reach a minimum rate of 90%.

5 - To review the syllabuses to cope with the new trend of society towards socialist transformation, support of the economic development of the country, keep abreast of the times in science and knowledge and emphasis on science.

../..

6 - Technical Education Standard

- To develop equipment and instruments to be abreast of the times in progress.

- To develop training to realise production training.

- To develop specialists in conformity with our scientific state.

7 - Number of Students in one class

- To make arrangements whereby the average number of students per class does not exceed 40 in the first six year stage and 45 in the last three year stage, and to lay down regulations for single teacher schools whereby the number of grades shall not exceed 4.

- To make arrangements whereby the average number of students does not exceed 45 per class in the general secondary stage and 40 per class in the technical secondary stage.

8 - Percentage of Students to be reached in each stage of Education

- 80% of pupils who have attained the obligatory education age should be admitted to the first grade of the fundamental education stage.

- To arrange to reach the following percentages of admission of students who complete the fundamental education stage and pursue their studies in general and technical secondary education schools:

Year	Percentage of Admission to General Secon. Schools	Percentage Admission to T. S. Schools	Various Opportunities outside M.of Ed.
1970-1971	83	13	4
1971-1972	80	13	7
1972-1973	70	15	15
1973-1974	60	20	20
1974-1975	50	25	25

9 - To provide the necessary buildings to achieve the above percentages and to avoid the rotation of three schools in a single building.

../..

10 - To introduce the common stem system and diversified subjects in the general secondary education stage.

11 - To improve medical services by increasing the number of medical practitioners and female medical assitants and to deepen medical knowledge at all education stages.

12 - To construct roofed sports halls and hobby clubs in various mohafazats, to develop boys and girls work camps and to deepen military and civil defence education.

13 - To continue the free distribution of books to the students of the first six years at the fundamental education stage, to reduce the price of books for the remaining stages by granting the Directorate of Text Books an annual subsidy to cover a portion of the prices of goods distributed free of charge and to promote the editing, publishing and printing standard of text books.

14 - To provide existing and newly opened elementary schools, the number of the classes of which exceeds 3, with essential educational aids, and to classify schools into groups, one of which will provide other aids (cinema, duplicating machine, etc.).

15 - To provide the existing preparatory schools and the newly opened preparatory and secondary schools with the essential educational aids.

16 - To recruit a full administrative staff to serve the purposes of the teaching staff.

b) Higher Education

The objectives of the third five-year plan (Ministry of Higher Education and Universities) shall be:

1 - To admit a greater number of students in both universities and intermediate and higher institutes gradually to satisfy the desire of students on the one hand and to meet the actual needs of development on the other.

2 - To arrange to have full teaching staff in the various faculties of the universities and the institutes in harmony with the higher education plan.

3 - To pay a great concern to the faculties and departments of sciences, to advise students to enrol in these faculties and departments instead of theoretical faculties,

../..

and to review the curricula of higher education to serve the purposes of the Syrian Arab Republic at the stage of socialist transformation.

4 - To introduce postgraduate studies in universities.

5 - To introduce and encourage research work in the faculties of sciences at both universities.

6 - To initiate a wide construction programm at both universities to provide the necessary buildings for newly opened and old faculties to cope with the expansion and development of these faculties, and to introduce modern technology.

7 - To lay special emphasis on foreign languages and to open a language institute for this purpose.

8 - To open new branches in both universities.

9 - To initiate five higher institutes outside Damascus and Aleppo, including the higher veterinary institute in Hama and the higher chemical and petro-chemical engineering institute in Homs.

10 - To construct a medical building at Damascus University for the Faculty of Medicine, the Faculty of Pharmacy, the Faculty of Dentistry, the Nursing School and a research centre, and a hospital, 1000 beds.

11 - To introduce modern medical treatment methods such as cobalt and physiotherapy and to construct the necessary buildings for this purpose.

12 - To develop and expand the hospitals attached to the Faculties of Medicine at both universities to serve the purposes of these faculties and to provide the specialised medical practitioners of a high st ndard of training and qualifications.

13 - To provide the faculties and laboratories of the universities and higher institutes with scientific and laboratory equipment to serve the purposes of education and scientific research.

14 - To make up the shortage in specialists with intermediate qualifications by opening five intermediate institutes for various fields of specialisation, especially in medicine, engineering, agriculture, secretariat, etc. to develop the necessary number of specialists.

../..

15 - To increase the number of residential buildings in university cities to provide accommodation to the greatest number of university male and female students.

16 - To give opportunity to the Student Union to play their full role in university life.

17 - To provide labraries, clubs, gardens and public services to create the university atmosphere that will serve to develop the student culturally and scientifically.

18 - To develop the nuclear studies so as to benefit from achievements for the progress of medicine, agriculture, exploitation of oil and minerals and utilisation of underground water by arrangement for the development of atomic energy committee to become an independent organisation.

19. To initiate marine studies and sciences centre to benefit from the potentialities locally available and to extract sea resources.

c) **Scientific Plan**

The objectives of the plan shall be:

1 - To initiate, substantiate and expand the foundation of scientific research in ministries and scientific organisations, to arrange for the correlation of the centres of science with life and production to solve the problems that hinder the implementation of the State social and economic development programs, and to develop a new generation to carry out research and application in all fields to secure continued progress and to follow up scientific developments abroad.

2 - To substantiate the economic and social development plan and to provide the necessary qualified specialists through various scientific scholarships and visit of specialists whereby coordination and harmony between scientific, technical and technological personnel necessary for the development of national economy to meet the needs of development and the scholarships under the plan would be maintained.

3 - To provide the scientific instruments for scientific research laboratories and to construct the necessary scientific premises lacking in the Syrian Arab Republic.

../..

d) Medical Services

The objectives of the plan shall be:

1 - Medical Personnel

Medical Staff

- To increase the number of medical practitioners, allowing for a rise in the various fields of specialisation from 1500 in 1969 to 2920 in 1975, thus decreasing the number of persons attendable by one doctor from 4165 to 2523.

- To arrange for the distribution of doctors over the Syrian Mohafazats whereby the ratio between cities and towns would be almost balanced by adopting various incentives and procedures to provide proper balanced distribution.

Dentists

- To increase the number of dentists, allowing for a rise from 353 to 738 by the end of 1975, thus decreasing the number of persons attendable by one dentists from 17697 to 9982.

Nurses and Midwives

- To increase the number of nurses, allowing for a rise from 586 licensed nurses to 1117, thus decreasing the number of persons attendable by one nurse from 10238 to 6267 in 1975, and to increase the number of midwives, allowing for a rise from 300 licensed midwives to 785.

Medical Assitants

- To increase the number of medical assistants, allowing for a rise from 124 to 775 assistants specialised in in various fields.

2 - Hospitals and Beds

- To provide for the rise of public hospitals from 31 to 42, i.e. 11 new hospitals, or for the expansion of the present hospitals whereby there will be a new hospital in each mohafazat to provide the various medical services.

../..

- To provide for a rise in the number of beds from 6156 to 10118 whereby there will be one bed for every 692 persons as compared with the figure 975.

- To provide for a balanced distribution of beds among the various departments and to open new departments.

3 - Medical Services Extension

Preventive Medicine

- To develop preventive medicine services to cover the child and mother welfare, environment health, and provision of vaccination against contagious diseases such tuberculosis, malaria, small pox, poliomyelitis, etc. and to provide for a higher percentage over total services provided by the Ministry of Health, allowing for a rise from 25% in the basic year to 40% by the end of the third five-year plan.

Essential Medical Services

- To develop and improve the curative and preventive medical services to provide a standard of equally integral services to all classes of the people.

Health Insurance Scheme

- To initiate a primary health insurance scheme to cover civil servants, employees, workers and their families. The number of beneficiaries by the end of the plan will be about 750 000. This scheme shall be financed by joint contributions by the beneficiary and the State or the employer.

4 - Medicines Policy

- To initiate the local processing of medicines and to dispense first of all with imported medicines and to set up a supreme departmental authority on which all parties concerned are represented with financial and administrative independence to lay down a medicine policy plan and to be responsible for the export, processing and distribution of medicines.

5 - Public Health Policy

- To provide medicines to all classes of people, to pay great concern to health services in the country side and to the balanced distribution of these services over the country, to find radical and suitable solution to

../..

curtail the immigration of doctors, to encourage doctors residing abroad to return home, to disseminate health knowledge through information and education media, to give the opportunity to people organisations to play their role in this respect and to issue the necessary legislation to require practising doctors to renew their registration annually with the Ministry of Health for knowledge of practising the profession and health statistics.

Cultural, Tourist and Extension Services

The objectives of the plan shall be:

Cultural Services

1. To promote the activities of the Ministry of Culture, Tourism and National Guidance in the fields of editing and translation, and to revive and disseminate the Arab culture, allowing for the rise of the number of books written from 25 to 200 by the end of the third five-year plan and the rise of realised books annually from 3 to 8 by the last year of the third five-year plan.

2. To disseminate and circulate culture through:

   - Converting Usama Magazine to a weekly periodical and increasing the number of issues.

   - Issuing a magazine for youths between 13 - 18 years of age dealing with their affairs.

   - Increasing the number of books at the rate of double the present annual number.

   - Issuing a magazine dealing with theatre, cinema and various art affairs.

3. To initiate cultural centres, to provide culture to all classes of people, and to enrich public libraries with books.

4. To establish a public library in Damascus with scientific cultural and intellectual books for prospective readers.

5. To initiate the implementation of the proposed plan for the elimination of illiteracy.

6. To circulate art culture to various social classes and to make arts accessible to all through the establishment of of plastic and applied arts centres and exhibition halls.

Tourist Services

1. To arrange for the utilisation of tourist wealth by establishing an advanced tourist facilities that will allow for the rise of income from 84 million Pounds Syrian to 113 million Pounds Syrian by the end of the last five-year plan through the development of lodgings and the reconstruction of the Syrian coast.

2. To encourage the private sector and municipalities to provide auxilliary tourist facilities such as hotels, swimming pools, playgrounds, theatres, entertainment houses and restaurants/bars.

3. To arrange for the coordination of the efforts of the Directorate of Tourism with those of other Government Authorities to provide the necessary major essential services for tourism such as the provision of electric energy, pure water, postal and telephone facilities and the adequate expedient means of transport to developed tourist areas.

4. To develop tourist propaganda, to open tourist offices at important world centres and to support tourist and transport offices in Syria.

5. To provide the necessary specialised personnel to manage and run the various tourist facilities by opening the necessary schools for specialisation in this field by a sufficient number of personnel who will attend courses in administration, organisation, marketing, research, welfare and tourist planning.

6. To initiate tourist coordination among Arab countries, especially Tripoli Pact member states, and to participate in common Arab projects such as international Arab airlines, Arab navigation company, Arab hotel and tourist marketing firm and common tourist offices.

Antiquities and Museums

1. To arrange for the expropriation of historical buildings and archaeological sites for protection and maintenance purposes.

2. To resume exploration and excavation on a wider scale, especially in Palmyra, Bosra, and Raqqa, and to carry out excavation in sites that go back to the pre-historical age, the bronze and iron era and in new sites.

../..

3. To resume repair on a wider scale of antiquary and historical ruins discovered in major locations and of the coastal citadels.

4. To initiate new central and regional museums for the exhibition of new discoveries and for giving a full picture of the civilizations that had grown and prospered in the country.

Cinema

1. To construct a cinema city with various studios, technical equipment and ancillary workshops to expand film production whereby the Organisation would be able to produce 8 long films and 35 short films by the end of the five-year plan.

2. To reduce the number of imported films gradually until the figure will be 100 in 1975.

Youth and Sports

- To elaborate studies and designs to construct youth and sports centres, roofed halls and other sports facilities such as playgrounds and youth camps in the Mohafazats.

f) Social and Labour Services

Rural Welfare

1. To arrange for the review of the present status of the existing rural welfare centres and to attach each unit to the competent state authority, allowing the Ministry to retain the social and cultural unit for development purposes, to raise the social education standard, to disseminate sports spirit, to arrange for the proper waste of leisure time, to arrange for anti-illiteracy campaigns among persons of age, to disseminate cooperative spirit among farmers, to open ginlergartens, to carry out these various social activities in country side.

2. To arrange for a better utilisation of the production units of extension teams and to develop output to reach the following figures:

22000 sq. m. of carpets per annum
10000 sq. m. of mats per annum
5000 sq. m. Maraz goat hair mats per annum

by the end of the third five-year plan.

../..

3. To provide training to 4000 male and female members over the third five-year plan to provide skilled labour to productive units.

4. To expand the services of extension teams and to open certain units in areas where it is established that there is need for such services and where conditions are suitable.

5. To expand the services of the extension teams to cover certain cities for the purpose of the employment of women in poor quarters and for the prospective recruitment of female trained workers for employment in productive units.

Social Welfare

1. To provide protection for juvenile delinquents and juvenile exposed to delinquency by providing care and attention to children from birth until they attain 18 years of age.

2. To provide for the welfare and education of children who have been deprived of parents normal attention such as foundlings, orphans and to provide the necessary preventive and curative organisations.

3. To provide attention and welfare to major persons who are in need of such services such as persons of old age, patients suffering from incurable diseases and beggars by improving the standard of the present old person houses, initiating hospitals for incurable diseases and centres for the employment of beggars.

4. To provide attention and health and vocational training to bodily and mentally retarded persons to transform the idle potentialities into productive potentialities and to participate in lessening the burdens of these persons and to make them feel settled leading a normal life.

5. To make arrangements whereby the Government will gradually assume the responsibility to manage and run the social welfare organisations ran by the national sector.

6. To secure a minimum standard of a decent living where the supporter of the family dies or where there is no earning because of disability or old age or widowhood or or orphanhood that may be experienced by certain classes such as craftsmen, low earning persons, women and cholдren, by initiating a stage social security scheme for these calsses.

Labour

1. To arrange for social and economic survey of the manpower of various categories in the light of general census.

../..

2. To handle the ever increasing immigration from country side to town by carrying out the necessary studies for apparent and latent unemployment, the promotion of the rural standard and the introduction of particular hand crafts.

3. To develop the present recruitment offices to become a nucleus of manpower offices.

4. To amend labour legislation to establish social production relations whereby labour syndicates would be given an actual effective role in the management of economic establishments, to found incentives on the basis of normal incentives and to provide equal conditions of work.

5. To implement the principle that uniform scale of wages should be applied in return of the same work and to define the social and economic function of remuneration.

Agricultural Labour

1. To arrange for the continuous support for the implementation of farmer societies scheme.

2. To develop the farmer cultural institutes to meet all political, economic and social needs of farmers and to create a farmer culture to cope with the spirit of the age.

3. To pay great concern to rural accommodation so as to provide accommmodation satisfying the hygienic conditions to those working in the country side and to disencourage immigration to town and to reconstruct the Syrian country side.

4. To develop an agricultural labour inspection machinery for the implementation of the provisions of the Law of Agricultural Relations with a view to providing an effective protection to farmers and agricultural workers and assisting in controlling agricultural custom and usage.

Social Security

1. To develop the Law of Social Security to eliminate differences in the various types of insurance applicable to various categories of workers, to extend coverage (scope) and to increase the benefits.

2. To introduce the health insurance scheme as a new branch of insurance, and to establish Institution hospitals and dispensaries to cover medical treatment as a result of

../..

occupational accidents and diseases.

3. To provide labour housing and to establish a permanent fund for this purpose.

Women General Union

1. To fill up the gap in not providing education to children between 3 and 6 years of age by opening a sufficient number of gindergartens in various Mohafazats, regard being had to the fact that guidance has great effect on the development of the life of the child at this age.

2. To establish and construct a number of nurseries for children between one month and three years of age to provide care and physical and psychological welfare to the children of mother workers.

3. To develop the necessary specialised personnel to manage gindergartens and nurseries.

4. To establish woman vocational training centres for sewing, embroidery, wool knitting and typing.

g) Public Administration Services

To initiate the construction of buildings for ministries, administrations and institutions, being as a building block for one Ministry or more and all the departments attached to it or to them, to save rentals paid by the State and to improve services and to save time.

VII - Objectives of Internal Trade Sector

1. To provide for gradual Government trade control of whole sale and to establish the necessary internal trade organisations for the realisation of this objective.

2. To support consumer goods cooperative societies, to enlarge their participation in retail-sale, especially in the countryside or in large residential or trade grouping areas, to reorganise them to consolidate their efforts, to form regional unions and a general federation at the country level.

3. To re-organise the market relations whereby Government and cooperatives would have a larger share in retail-sail held by the private sector and the possibilities of monopoly, exploitation and fradulent practices in prices would be curtailed.

../..

4. To endeavour to initiate a pricing scientific sound policy that would achieve the highest degree of stability possible, and to employ prices as an economic tool and incentive to eliminate disharmony between production and consumption.

5. To enlarge the local market (Distribution system and Sale figures) to cover the countryside with a view to promoting the supply services standard and to minimizing differences between city and countryside.

6. To raise the standard of bread, being the essential food of the people, to develop and construct modern mechanical mills, to introduce on a wider scale mechanical bakeries.

7. To enlarge ordinary and technical storage capacity.

8. To develop the circulation stage, to improve trade services and to modernize business practices.

9. To correlate the international trade policy to the plans of industrial and agricultural production, foreign trade, construction and other sectors within the State general policy, whereby there would be a rational inter-reaction and equilibrium/balance between the interchange stage and the remaining stages of the renovation of production, and the satisfaction of the ever increasing needs of society and citizens in a manner congenial to this stage would be realised.

VIII - Objectives of Foreign Trade Sector

1. To change the structural composition of exports and imports whereby export of raw materials, especially agricultural would be lower and export of processed (as far as possible) goods would be higher.

2. To increase the export of processed commodities.

3. To curtail as far as possible unnecessary imports with a view to minimizing the long outstanding dificit in Syria's Trade Balance.

4. To develop economic relations with foreign countries:

   - To develop trade with friendly Arab countries, to adopt scientific measures to realise inter economic coordination and integration, to substantiate economic unity and common Arab market, and to initiate other forms of Arab economic cooperation.

../..

- To establish new economic relations with the peoples of the third world countries under way to national independence and full liberation from subordination of various forms.

Import of Commodities and Services

1. To encourage production of consumer goods to replace imported consumer goods in favour of revenues to raise capital and to provide the means of production.

2. To curtail the import of unnecessary commodities and such commodities that can be replaced by local products, even if they are inferior in quality.

3. To give priority to the export of necessary raw materials for locally manufactured machines, equipment, instruments and spare parts.

4. To lay special emphasis on export direct from country of origin either for public or private sector to save payment of commission fees in foreign currency.

5. To minimize unnecessary services such as tourist visits and study abroad and to initiate local incentives and replacements.

Export of Commodities and Services

1. To minimize the export of raw materials and consequently to increase the export of processed commodities.

2. To increase the volume of trade with friendly countries especially Arab Peninsula.

3. To endeavour to initiate new markets in Africa and Asia where there is a suitable large consumption market.

4. To reduce the financial burdens on processed or unprocessed national products which are difficult to dispose of in foreign markets because of their high price.

5. To substantiate direct or indirect financial support to certain processed commodities to compete with foreign commodities.

../..

6. To promote tourism and travel in the country and to provide the necessary facilities in this respect, constructing the suitable tourist facilities starting with the low cost projects.

7. To encourage transfers through the available means by Syrians and immigrants abroad.

IX - Objectives of Finance, Monetary and Banking Sector

1. To develop the finance machinery and regulations to be in harmony with the needs of the economic and social development plans and to participate in their continued implementation.

2. To review tax chargeability rates and methods of collection, to cancel exemption and to replace such exemption by subsidies if and when necessary, to realise just levies among categories of persons chargeable and to minimize differences in the distribution of wealth and income.

3. To modify the government consumption structure to provide the highest social service facilities through development of services that would conduce to the rise of the productivity of workers or the service of consumer goods.

4. To introduce calculating machines for the finance processing accounts, card system.

5. To establish a tax information centre.

6. To introduce a plan for interests on liquid assets in all public sector organizations, to the exclusion of banks, by establishing a special fund (or bank) for economic organizations to deposit their accounts and cash surpluses to be used when necessary.

7. To develop savings trend, to promote reactivities of post savings and other savings organizations, to distribute their investments on development projects in a manner congenial to the nature of their functions and operations.

../..

8. To improve the methods and procedures of investment, trading and distribution in public sector commercial organizations whereby their income would be commensurate with their business figure and the whereby the net income would be up to an acceptable economic standard.

9. To review the positions of all economic and educational organizations whose deficit is financed by the state budget with a view to improving their business procedures and raising their productivity and to propose solutions to avoid losses.

10. To organize the flux of cash and credit according to the plan laid down for this purpose in conformity with the requirements of commodity and service production and distribution with a view to maintaining relative stability in prices.

11. To enlarge banking services and to make arrangement whereby banks would participate in financing the plan.

INVESTMENT
PROGRAMMES

Annex 2

Investment Programmes

rticle 1

The global investments of the Third Five Year Plan for nomic and social developments (1971 - 1975) shall be tributed with a view to attaining the desired rate of develop- to the public and private sector and the economic sectors as the following table:

c t o r	Public Sector	Cooperative Trade & Private Sector	Total
Euphrates Irrigation and Land Reclamation	1,593,000	-	1,593,000
Agriculture	211,756	140,000	351,756
Industry	436,123	140,000	576,123
Power and Fuel	1,172,976	150,000	1,322,976
Transport and communications	1,013,808	-	1,013,808
Public utilities and People work service	783,045	100,000	883,045
Services	585,885	902,947	1,488,832
Internal Trade	525,764	100,000	625,764
	124,696	20,000	144,696
TOTAL	6,447,053	1,552,947	8,000,000

icle 2

The investment of the public sector shall be distributed as lows:

a) Gloval schedule number 1 shows the distribution of these investments to economic sectors.

b) Schedule number 1/a shows the distribution of investments to executing authorities.

c) Schedule number 1/b shows the distribution of investments to development projects.

../..

Article 3

a) The investments allocated under Clause (a) - Projects Under Implementation, and Clause (b) - New Projects, shall be considered the final investments allocated to the executing authorities and may be increased or modified only within the framework of the objectives of the plan.

b) The investments allocated under the heading (C - Reserve Projects) shall be considered Reserve Investments and no expenditure shall be outlayed except by an order by the President of the Council of Ministers, the Chairman of the Supreme Planning Council, upon a proposal by the Supreme Planning Council and with the recommendation of the [illegible] Planning Authorities.

c) The activities of the executing authorities shall be oriented to the execution of the projects under implementation and the new project so that they would be ready for operation as soon as possible.

d) The execution authorities shall complete all detailed economic, technical and social studies of the new projects and these projects shall not be executed before the completion of such studies.

Article 4

The Ministry of Finance shall allocate the necessary appropriations to meet and to settle all debts and obligations payable as a result of the execution of the projects under the Second Five Year Plan within the appropriations allocated to Public Debt Fund under Part 5 of the General Budget for the period from 1971 to 1975 and these appropriations shall be paid under Ad-hoc statements transmitted by the authorities concerned.

Article 5

The appropriations allocated for replacements and extensions shall be paid under the instructions to be issued by the Ministry of Industry.

../..

Article 6

All competent authorities shall observe the principle of sparing in construction and building and avoiding lavish expenditure. Construction shall be limited to the objective operation of the project and the project cost shall be within the minimum expenditure possible.

Schedule No. 1

Third Five-Year Plan Investments by Economic Sectors in order of Priority

(In Thousand L.E.)

Sectors	FIRST PRIORITY PROJECTS						SECOND PRIORITY			
	A) PROJECTS UNDER IMPLEMENTATION		B) NEW PROJECTS		TOTAL (A) + (B)		C) RESERVE PROJECTS		TOTAL (A + B + C)	
	Investments	C. Facilities	Investments	C. Facilities	Investments	C. Facilities	Investments	C. Facilities	Investments	C. Facilities
1. Exploration	1,560,000	375,000			1,560,000	375,000			1,560,000	375,000
2. Irrigation & Reclamation	51,978	2,477	154,050	31,000	211,728	33,477	128,675		340,031	33,477

Projected Outlays over the Third Five-Year Plan Classified in order of Priority

1971 - 1975

1/B - Detailed Schedule

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Ministry of Euphrates				
General Organization of the Euphrates Project				
a - Projects under implementation				
- Euphrates Dam	570000	380000	950000	325000 (1)
b - New Projects	-	-	-	-
Total Appropriations	570000	380000	950000	325000
General Administration for the Development of the Euphrates Basin				
a - Projects under implementation				
- Euphrates Basin Project	414000	229000	643000	30000 (2)
b - New Projects	-	-	-	-
Total Appropriations	414000	229000	643000	30000

1. Credit Facilities under 1966 Agreement

2. 25000 credit facilities to be obtained. 5000 U N. contributions to the Pilot Project.

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
2. Ministry of Public Works and Water Resources				
a - Projects under implementation				
1. Completion of small and medium size dams	760	240	1000	-
2. Modification of Jagh-Jagh course in Hassetche	500	-	500	-
3. Purchase of machinery for irrigation systems	10	240	250	-
4. Previous works and old contracts for Projects under First and Second Plans	1715	-	1715	- (1)
Total Appropriations	2985	480	3465	-
b - New Projects [illegible]				
1. Drilling and Equipment of Desert Wells	750	250	1000	-
2. Second Phase of Tell Meghass Systems. Hassatche				
- Construction of Drainage systems at Ajaja, Hassatche				
- Execution of Ain Batman Irrigation Project, Aleppo				

1. Projects of Irrigation, Industry, Agriculture and Services.

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
- Study and Design of Nassrieh Irrigation Project, Tell Kalakh				
- Repair and Improvement of Existing Irrigation and Drainage Systems	4480	270	4750	-
3. Improvement and modification of Barada, Khabour and Jagh-Jagh courses	5400	850	6250	-
4. Drainage of Siha (Idlib) and Mari' (Aleppo) marshes	350	750	1100	-
5. Construction of small and medium size dams	15910	4000	19910	-
Total Appropriations	26890	6120	33010	-
c - Reserve Projects	2000	5000	25000	-
Grand Total	49875	11600	61475	-

Major Projects Organization

a - Projects under implementation

1. Completion of Ghab Project	16000	7000	23000	-
2. Completion of Roudj Project	9500	1500	11000	-
3. Join Administrative Expenses	7500	500	8000	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
4. Completion of Tartous Port Project	11020	14660	25680	8160
Total Appropriations	44020	23660	67680	8160
b - New Projects				
1. Construction of Silos	86000	64000	150000	35000 (1)
2. Study and Execution of Nahr El Kabir el Shimali Dam	37000	28000	65000	28000 (2)
3. Study andExecution of Tell Daou Dam	3000	2000	5000	-
4. Study of Water Basins	2000	10000	12000	-
5. Study of Various Dams (Ifrin. Saroun, Abrash, Arous and Nahr El Kabir El Janoubi) andutilization of Yarmouk River	1000	3000	4000	-
6. Study and Execution of Upper Orontes Valley Irrigation Project	16000	4000	2000	-
Total Appropriations	145000	111000	256000	63000

1. Credit Facilities under Agreement with Kuwait

2. Agreement with U.S.S.R.

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
c - Reserve Projects				
1. Study and Execution of el Seen Spray Irrigation Project	10000	2000	12000	-
2. Study and Execution of Hama Storage Dam	45000	15000	60000	-
3. Study of Khabour Water Storage	2000	13000	15000	-
4. Various Studies: Barada, el A'waj and high lands at Acharneh	1800	3200	5000	-

3. Plant Protection Research	169	321	490	-
4. Cotton Breeding Research	740	260	1000	-
Land Reclamation Schemes				
1. Limitation and Reclamation of Saline-Soil	4022	2670	6692	-
2. Land Classification	997	190	1187	-
Irrigation and Drainage Schemes				
1. Development and Exploitation of Ghab	1900	2520	4420	2477
2. Irrigation and Drainage of Manajeer	717	150	867	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Animal Production Scheme				
1. Cow and Damascus Goat Stations	2000	1240	3240	-
2. Aleppo Cow Station (Zarba)	1800	1230	3030	-
3. Poultry Farm	14270	7960	22230	-
4. Distribution of Cows and Poultry	3165	6765	9930	3390
5. Introduction of Animal Husbandry in Agricultural System	1208	1245	2453	1200
6. Stabilization of Livestock breeding (provision of fodder to ordinary sheep)	2203	3418	5621	3200
7. Veterinary service Centres and Artificial Insemination	3119	22180	25299	-
8. Construction of Fish Farms	2736	3404	6140	-
9. Utilization of Natural Water Collections	1000	770	1770	-
Forestation and Forest Schemes				
1. Forestry and Forestation methods	5800	3300	9100	1000
State Farm Support Schemes				
1. Development of Fish Farm at Kattineh	1200	150	1350	-

(In Thousand L.S.)

	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Delimitation, Demarkation and Abolishing of Mucha'a (Common Land) Schemes				
1. Delimitation, Demarkation and Abolishing of Mucha'e Scheme	3825	1575	5400	-
Total Appropriation	97542	91859	189401	15652
b - New Projects				
Agricultural Structure Support Program				
1. Establishment of Agricultural and Veterinary Schools	5692	6295	11987	-
Plant Production Program				
1. Development of Fruit Trees Plantation				
a. Fruit Trees	1472	649	2121	-
b. Breeding of Tree Nurseries	1093	643	1736	-
2. Development of Vegetables				
a. Vegetables	278	389	667	-
b. Breeding of Vegetables	747	530	1277	-
3. Promotion and Development of Field Crops	2200	1800	4000	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
4. Development of Metrological Stations for agricultural purposes	703	797	1500	-
Breeding Program				
1. Cotton Seed Breeding	1000	600	1600	-
2. Cleaning of Cotton Seeds	775	3000	3775	-
Scientific Research Support Program				
1. Development and Improvement of Potato Production	1181	223	1404	-
2. Regional Centre for study of Dry Areas and Border Land	500	-	500	-
3. Development of Animal Production Research	1297	248	1545	-
Land Reclamation Program				
1. Solution of the Problems of Fallow Land in Agricultural Settlement Areas	767	190	957	-
2. Plant Ecology	132	20	152	-
3. Cereals Fertilizing in non-Irrigated Cultivated Land	3561	160	3721	3000

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Agricultural Machinery Program				
1. Equipment and Operation of Agricultural Machinery Stations in:				
a. Skeilbieh	1300	6700	8000	-
b. Kamichlive	1050	3165	4215	-
c. Ragga	1600	3310	4910	-
2. Development of Agricultural Harvesting Machinery	375	1125	1500	-
3. Construction of Garage and Central Workshop	100	350	450	-
Irrigation and Drainage Program				
1. Reconstruction and Equipment of Desert Wells	-	1000	1000	-
2. Field Irrigation and Drainage in Ghab	7000	3000	10000	-
Economic Insects Development Program				
1. Development of Honey Production	365	267	632	-
2. Development of Silk Production				
a. Development of Breeding	382	418	800	-
b. Completion of the Silk Plant	65	635	700	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Animal Production Program				
1. Establishment of Milk Cow Breeding Stations at Homs	2625	773	3398	-
2. Development of Cow and Goat Breeding	479	236	715	-
3. Development of the Meat Production Farms	5720		5720	-
4. Development of Milk and Meat Production in Ghab	1802	573	2375	-
5. Establishment of Arab Horse Stations at Hama	730	200	930	-
6. Survey of the Syrian Coast	250	690	940	-
Forestration and Forestry Program				
1. Developments of Forests and Expansion of Forest Areas	10000	5000	15000	-
2. Construction of Wind Breakers in Ghab	1200	600	1800	-
State Farms Support Program				
1. Development of State Farm	4000	6000	10000	-
2. Equipment of State Farms	1510	7011	8521	-
3. Improvement of Pasture Land in Syrian Djezirah	1199	1711	2910	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
4. Development of Khaled Ibn el Walid Farm	282	718	1000	-
Agricultural Cooperative Federation Support Program				
1. Establishment of Agricultural Machinery Operation and Maintenance Stations	200	325	252	-
2. Establishment of Machinery Maintenance Workshops	150	200	350	-
3. Establishment of Service Centres for Sorting and Packing Agricultural Products	40	23	63	-
4. Establishment of a Saw-Mill for the Manufacture of Wooden Containers	7	14	21	-
5. Establishment of Stores	500	106	606	-
6. Establishment of Refrigerators Stores and Olive Oil Mills	350	[illegible]	1000	-
Total Appropriations	64672	60348	125020	[illegible]
c. Reserve Projects				
Agricultural Structure Support Program				
1. Development of Agricultural Statistics by random samples	3008	31	3039	-

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
2. Establishment of Agricultural and Veterinary Schools	3000	2000	5000	-
Agricultural Machinery Program				
1. Establishment of Agricultural Machinery Station Aleppo	1050	2460	3510	-
2. Establishment of Agricultural Machinery Station Hassaki	750	1740	2490	-
Irrigation and Drainage Program				
1. Field Irrigation and Drainage in Ghab	8225	11350	19575	-
2. Development of Irrigation Drainage and Levelling methods	900	600	1500	- (1)
Animal Production Program				
1. Establishment of Milk Cow Stations at Hassake	3125	773	3898	-
2. Establishment of Milk Cow Stations at Tartous	3125	773	3898	-
3. Development of Home Poultry Station	1125	775	1900	-

(1) To be financed from Contributions by the Cooperative Federation and long-term loans advanced by the Agricultural Cooperative Bank.

(In Thousand L.S.)

Project	Outlays over the Third Five-Year Plan			
	Local Currency	Foreign Currency	Total	Credit Facilities
Forestration and Forests Program				
1. Development of Forests and Expansion of Forest Areas	37810	8535	46345	-
State Farms Support Program				
1. Development of State Farms	4862	6617	11479	-
Total Appropriations	66980	35654	102634	-
Grand Total	229201	187857	417058	18652
Ministry of Industry				
Vocational Training Centres, Damascus and Aleppo				
a. Projects under implementation				
- Expansion and Establishment of new Departments at the Construction & Trade Centres	101	-	101	-
- Equipment of Industrial and Architecture Drawing Centres	300	140	440	-
- Equipment of Secretariat Training Centre	200	153	353	-
- Expansion & Establishment of new Departments in Metallurgy	336	200	536	-

(In Thousand L.S.)

ANNEX No. 3

Public Sector Income

Article 1

The income allocated to finance the Public Sector investments over the Third Five-year Plan at 1970 prices shall be specified as shown in Schedule No. 2/A and detailed Schedules No. 2/B appended.

Article 2

The competent authorities shall realise their respective estimated income under the plan and shall take the necessary measures to this effect.

Article 3

The competent authorities shall transfer to the Ministry of Finance (Directorate of Public Debt) the excess of their respective income surplus to finance the development projects.

Policies, Measures and Procedures

for the Success of the Plan

Annex 4

Policies, Measures and Procedures for the success of the Plan

Article 1

Ministries, Administrations, Organizations and all authorities concerned shall comply with the policies, measures and procedures provided for in this Annex for the success of the plan and the provisions for implementation shall be drafted in consulation with the State Planning Authority.

I - Measures Relevent to All Sectors

1. The State administrative machinery shall be so reorganized to be in harmony with the requirements of the social and economic development, formalities shall be cancelled and anticipated partial idleness in State departments shall be abated.

2. The State salaries scale. and promotion procedure shall be reviewed both salaries scale and promotion procedure shall be correlated to production and service rendered, and a material incentive procedure shall be introduced with a view to recruting and developing specialists, encouraging specialization and increasing output.

3. Incentive procedure shall be laid down for the encouragement for the execution of the scientific plan, submission of proposals and introduction of such proposals into the production operations.

4. The scope of specialist allowance shall be widened to cover all categories participating in economic and social development specially economists.

5. Economic and cost accounting systems shall be applied and the contract regulations shall be applied in various economic organizations.

6. Material and moral rewards shall be paid to economic organizations that would be successful in raising the surplus figure estimated or in reducing the expenditure or on production or in completing their projects before the appointed tine.

../..

7. Planning and statistics machinery in Ministries, administrations, organizations and executing authories as well as control and inspection machinery shall be supported.

8. Finance Planning shall be greatly concerned with and plans shall be issued before the beginning of the period fixed for implementation.

9. Information campaigns to disseminate knowledge of the annual and five year social and economic plans and their production objectives and the role of the citizens in implementing such plans shall be carried out.

10. The legal procedure relevent to finance and the accounting procedures and the preparation and implementation of development contracts shall be relaxed and simplified.

11. The principle of personal responsibility shall be applied in all production projects.

12. The establishments of the authorities supervising the execution of development projects shall be reviewed so that they would be able to discharge their duties.

13. Service in remote areas shall be encouraged.

14. The graduates of institutes, schools and industrial, agricultural technical and vocational training centres shall be recruited on a wider scale.

15. Economic, scientific, technical and cultural cooperative agreements shall be utilized fully to meet the requirements of the plan.

II - Measures Relevent to Each Sector.

1. Irrigation and Agriculture

1. Cooperative societies shall be supported through their being granted pricing prevelages in respect of financing and marketing the products that should be marketed through the public sector.

2. Agricultural machinery shall be provided at a lower price to secure a wider employment of such machinery provided that their prices shall correspond to the prevailing prices in neighbouring countries.

../..

3. No damage shall be constructed unless all technical, economic and social studies are completed by the the dam central committee that includes all competent technical authorities.

4. Agricultural survey shall be carried out in 1971 for this survey will be an important source of agricultural statistics of all agricultural holding indices.

5. Masha' (common) agricultural system shall be abolished, being a back-ward system that impedes the improvement of land and the rise in production and the cooperative system shall be applied, being congenial to the circumstances prevailing in the Syrian Arab Republic.

6. A production policy congenial to the prevailing conditions in the area shall be laid down for introduction in agricultural areas.

7. The price of fertilizers shall be reduced for a wider adoption and Ad-hoc policy shall be introduced.

8. The agricultural technical personnel shall be distributed in a manner suitable to the production capacity of the administrative units and for the utilization of technical experience in the country-side and the agricultural specialists shall be charged with such duties congenial to their respective fields of specialization.

2. Industry

1. Economic and technical studies shall be prepared at the level of the establishment to determine the means for the promotion of the standard of output and income.

2. All necessary measures shall be taken to solve the problem of out of order machines by repairing, installation and operation of such machines with the least possible delay or by taking a decision in this respect in harmony with the exigencies of public interest.

3. Cost accounting and modern machinery shall be introduced and scientific progress shall be reviewed with a view to developing and improving production.

../..

4. The shortage in technical machinery and industrial establishments shall be made up, especially engineers and assistant engineers.

5. Workers shall after appointment undergo training courses on the works to be performed for a specified period. At the end of this period will be decided whether the worker is qualified to the duty to be entrusted to him.

6. A joint committee representing the competent authorities concerned with industrial projects shall be set up and shall consist of specialists in engineering, economics and various sciencies to appraise the projects intended to be constructed after a study of the local market, the structural composition and the existing possibilities with a view to benefit from the available unemployed production capacities, and, consequently, to avoiding the elements of frustration in the future, such as the need for additional investment that may be available or may lead to a lower degree of benefit from the constructed production unit.

7. An oil affairs supreme authority shall be set up with a power to decide all questions relevent to this sector.

3. Transport and communications

L. Customs clearance services at the Syrian ports shall be accelerated and necessary measures shall be taken for this purpose, and formalities shall be curtailed in this respect.

2. The number and field of specialization of technical personnel shall be made up in the communication sector.

3. Public sector companied shall be required to assume their responsibilities in executing the contracts within their fixed time limits and in satisfying themselves of the good quality of the materials under the contract, under pain of penalty.

4. The development of the traffic volume at both Lattakia and Tartous ports shall be evaluated and a comperative study shall be made to determine the priorities of expansion and the distribution of imports and exports between the two ports economically, calculations being on the basis of transport cost by trucks or by railways.

../..

5. Telex system shall be widely used for utilization by foreign trade organizations.

4. Public Utility

1. Planning and distribution operation in cities shall be accelerated with a view to provide plots ready for building and the organization supporting the private sector for building and building trade shall be substantiated to encourage this sector and to curtail rise in prices.

2. The formation of cooperative society in government administration and public sector establishments shall be accelerated and government authorities shall encourage such societies either by providing cash or providing land, besides technical advice.

3. The greater number of workers in cities shall be provided with accomodation in villages, transport facilities between these villages and the location of work shall be provided, and the necessary public utilities in villages shall be provided and improved so that such villages would become hygienic and cheap residential areas, whereby the problem of housing in the long run would be solved and the destruction of agricultural land and farms surrounding cities would be avoided.

4. The municipal machinery shall be reformed whereby salaries would not exhaust income.

5. Municipal council shall be re-formed to coup with the development of society, the socialist measures and changes and the increase of the role of the people sector and organizations, if the law of local administration is deferred.

5. Medical Services

1. Doctors, dentists, pharracist, Midwifes, Nurses and all assistant technicians shall annually register with the Ministry of Health so as to have data as to their continued practising of the profession and accurate medical statistics.

2. The possibility of Doctor devotion to full time service especially in areas where there is no sufficient number of medical practioner to provide medical services shall be studied in the light of the material means available over the Third Five Year Plan.

3. The subsidy formerly allocated by the Ministry of Health to defray certain expenses attending the stay of residents at State hospitals shall be restored.

4. The import, distribution and control of medicines shall be put under the supervision of the Ministry of Health, being in a better position to know the actual need and method of distribution of medicines, and, consequently the proper distribution of medicines for Pharmex has no accurate appraisal of the issue of medicines, a recommendation shall be passed for the setting up of a supreme medicines committee for the coordination of Syria's needs and handling all questions relevant to medicines, the import of medicines shall be correlated to local and Arab medicines processing and distribution shall be coordinated with the Ministry of Supply and Internal Trade.

5. Medicines issued free of charge and technical equipment and instruments used in the Ministry of Health and Government Organisations shall be sealed with a special stamp to avoid theft or use. Prefefarably, all Government Organisations and Administrations shall collectively import these materials by one tender to decrease cost and to obtain better terms and privileges.

6. All medical services provided by various Government Organisations shall be put under the supervision of the Ministry of Health to promote their efficiency.

6. Cultural, Tourism and Guidance Services

The prices of goods and books in hotels and airports shall be reviewed. These prices shall appeal to tourists to increase the volume of foreign currency.

Tourism propaganda shall be promoted, tourist offices shall be opened in important world centres and internal tourist and travel offices shall be supported.

7. Education

1. Technical and vocational education shall be put under the supervision of a single administrative authority to be agreed upon after the setting of an ad hoc committee consisting of key executives of the Ministries and Organisations concerned.

../..

2. Government sectors that benefit from the services of the graduates of university faculties and institutes shall be represented on the boards of directors of these faculties and institutes so that there would be continuous close correlation between the needs of these sectors and the theoretical and practical curricula of the faculties and institutes, whereby the technical personnel would be provided for the realisation of the projects of the plan.

3. Scientific scholarships shall be strictly confined to the Ministry of Higher Education for the Ministry is closely connected with this question and supervises the eleboration of the scientific plan laid down by the Supreme Sciences Council.

4. The appropriate scheme for school buildings with suitable requirements at minimum cost shall be initiated and a plant for pre-fabricated parts of the building shall be constructed to serve the purpose of constructing the greatest number of school buildings possible within the shortest period.

5. Teachers Training Schools shall no longer be decreased for the need for teachers in the long run demands the development of a sufficient generation of teachers commensurate with the anticipated number of students upon the implementation of the principle of obligatory elementary education more effectively, especially if it is held to extend elementary education over a period of eight years.

6. Cooperative movement courses shall be introduced into present curricula.

7. The Ministry of Education shall be given directions to repeal the communique prohibiting the Ministry Personnel from admission to the Planning Institute and to arrange for the enrolment of certain Ministry personnel in the said Institute so as to provide specialists in the field of economic and social planning.

8. The efforts of the people organisations in their anti-illiteracy campaigns shall be substantiated and medals and rewards shall be granted to any one who participates in the efforts to eliminate illeteracy.

8. <u>Scientific Plan</u>

1. The vacancy on the establishment shall be filled pending the appointment of the student on scholarship upon his return to avoid waste of time.

../..

2. The authority in whose favour the student is granted scholarship shall be given the opportunity to determine the conditions to be satisfied by the student and shall be given the power to specify the stage of his study and the fields of specialisation to be pursued by the student in detail and to oblige him to pursue the field of specialisation assigned.

3. The number of students on scholarship abroad shall be correlated to the number of graduates from Damascus University and Aleppo University and the need by State Machinery of their fields of specialisation.

4. The question of the survey of qualified persons and scientists shall be radically solved and State statistics macinery shall be given the necessary facilities to obtain an accurate data of this category from society, especially their social movement.

5. There shall be provided for the appointment of a co-specialist to accompany the foreign expert throughout the whole period of his service with the Government authority concerned, and the employment of the foreign expert shall be conditional on the availability of a co-specialist so as to benefit from the former's experience and to avoid losses arising out of the extension of the period of the expert's service or the employment of another expert for the same duty.

6. Arrangement shall be made to encourage as far as possible the return of immigrants home and to prevail on them to feel that they are citizens expected to return home to play their role as such and to participate in the development of their country, by conferring upon the competent Minister the power to cancel all decisions issued against the persons (civil servants and others) who left the country, if they voluntarily return home whre the Minister is convinced of this measure.

7. Students who are pursuing their studies at their own expenses s abroad shall be advised to specialise in the fields demanded by the development plan.

8. Contracts shall be made with students pursuing their studies at their own expenses abroad to return home and work therein. Where the student is certain that he will be employed upon his return home, he is no longer interested in the difference in better opportunities of earning and prefers to return home for work.

9. Arrangements shall be made to have optimum benefit from specialised young men and to support the scientific field by such specialists and by their modern experience and to provide incentives and the opportunities of promotion.

../..

and any thought to be conceived by older persons that they are competitors shall be eliminated, for each has his own field, experience, specialisation, responsibilities and the opportunities to prove his qualification. This is a translation of the principle "the right person in the right place" and serves to give the opportunity to young specialists, doctors and qualified persons to fill the congenial posts as full time persons with devotion to invention and innovation.

10. Arrangements shall be made to avail ourselves of specialised manpower available, for there is in the country such a sufficient number of specialists, doctors and qualified persons to overcome the great difficulties encountering work if we know how to avail ourselves of their stored experience.

9. Internal Trade

a) Wholesale

1. The variety of commodities distributed by the Consumer Goods Organisation shall be enlarged whereby this would be the main source for greengrocer and the grocer. This shall involve the variety of commodities imported or locally produced by the public sector or cooperative sector or private sector.

2. Arrangement shall be made for AFTOMETAL to initiate their duties and to open branches in all Mohafazats.

3. The Nationalized Arab Tanning Company shall be initiated as a nucleus to exercise hide import, processing and distribution operations.

4. A general organisation for meat and fish shall be established.

5. AFTOMACINE distribution system shall be enlarged to cover all Mohafazats.

6. PHARMEX distribution system shall be enlarged to cover Syria.

7. AFTOTEX distribution centres shall be increased in number for the distribution of products to retailers or for direct sale to consumers in all Mohafazats.

8. A general organisation for vegetables and fruits shall be established.

../..

9. SADCOP fuel stations shall be increased in number in all Mohafazats.

10. Wholesale technical material foundation shall be developed, especially a wider introduction of machines in accounting system, stores and sale centres.

b) Retail Sale

Government retail sale nucleus shall be initiated by:

1. Establishing a commodity centre in Damascus and a commodity centre in Aleppo.

2. Establishing a shop at Tabaka

3. Establishing 3 sale rooms in both Damascus and Aleppo and one sale room at each Mohafazat.

These organizations shall at first be attached to the Central Retail Sale Organization or th thd local authorities, regard being had to the objective ciccumstances at the stage of initiation and put into operation.

c) Consumer Cooperatives

1. The number of consumer cooperative societies or their branches in the country shall be increased from 59 in 1970 to 97 society or branch in 1975 and their activities shall be enlarged in the countryside or in large residential or trade areas.

2. The business figures of societies shall be developed to rise from L.S. 13400000 in 1970 to L.S. 27000000 in 1975.

3. Subsidies shall be granted for the initiation of consumer cooperative societies or for the enlargement of the activities of the present cooperatives.

4. Laws and regulations shall be so amended to give consumer cooperative societies facilities and privileges in their relation with both the public and banking centres and to make them a support of the Government internal trade sector.

../..

d) **Pricing**

1. Studies shall be made to initiate a pricing policy in harmony with the circumstances of the country and with the stage of socialist transformation on lines with socialist pricing theory.

2. Price policy centralization shall be initiated, allowing a certain measure of flexibility for the competent local authorities and the Mohafazats to implement this policy and to fix the prices of seasonal and local materials.

3. Price shall be employed as an economic tool and incentive to eliminate probable contradiction between production and consumption.

4. The pricing policy shall be correlated to the tax and duty system, customs tariffs, and banking interest.

5. Arrangement shall be made to realize sound stability in prices whereby price would be an index of the necessary labour socially rendered for the production of essential commodities, with due observance of social economic and political consideration, and for continuous endeavour to reduce the cost of production and to improve its conditions and quality

6. The number of consumer commodities the final sale price of which to the consumer is fixed in contrast to the system allowing for rates or margins of profits to intermediaries shall be enlarged.

7. Uniform sale price to consumer shall be introduced on a wider scale all over the country and arrangements for minimizing the differences between the city and the countryside shall be substantiated.

8. Scientific cost accounting system shall be initiated in the fields of agricultural, industrial and commercial production and the competent authorities shall be required to adopt this system and to review their cost.

9. The central pricing machinery shall be supported by specialists and shall be developed so as to be able to propose a pricing policy and to follow up implementation.

../..

e) Statistics and data for the Nation

1. Family budget research shall be prepared

2. Inhabitants income and expenditure balance shall be prepared.

3. Food budget in the country shall be prepared.

4. Development and direction of consumption shall be surveyed.

5. Price development shall be surveyed.

6. A survey of persons engaged in trading in all sectors (public, cooperative, private) shall be made.

7. Commodity balance of the major consumer goods shall be laid down.

10. Foreign Trade

1. Arrangements shall be made to export the minimum volume possible of raw materials and the maximum volume possible of processed and semi-processed goods.

2. The obstacles that impede export and increase cost shall be studied to overcome such obstacles.

3. The development of world prices of commodities exported by Syria, the development of future demand with reference to past demand and the trends of development importing our commodities shall be studied.

4. Opportunities for the export of our commodities demanded abroad shall be enlarged through participation in international fairs, supporting our commercial attache offices, concluding agreements with developed countries and opening marketing offices abroad

5. A general organization to promote our exports and to encourage both public and private sectors in the available fields at this stage.

6. Earnest endeavours shall be made to implement the principle of economic and industrial coordination and intigration in Arab market countries.

../..

7. Plants and unions shall be required to discharge certain export duties and plants or divisions of plants in whole may be required to assign their products for export only or for export in the first place.

8. Facilities shall be made to conclude long term trade agreements with friendly Arab countries, socialist countries and other friendly countries and earnest endeavours shall be exerted to remove the obstacles encountering the implementation of such agreements and to allow for a provision for payment through the export of Syrian raw materials or processed goods or semi-processed goods, and in particular there shall be a special enphasis for the inclusion of stock commodities difficult to market in these agreements, i.e. these agreements shall be barter agreements according to the exigencies of country interest so as to correlate import to export.

9. Our needs of all types of imports shall be studied scientifically with a view to determine priorities, and to define the limits so as to curtail luxury consumer goods and intermediate consumer commodities by designing and implementing a policy for local replacement.

10. The import of capital goods, especially instruments equipments and tools shall be encouraged for the development of production in the country.

11. Plan, studies and commercial information offices in export organizations shall be supported and arrangement shall be made to allow them to supervise and participate in administration, whereby they would be in a better position to assist in export at the lowest price within the minimum time limit, with the least cost and to provide the ideal reserve to meet local demand.

12. Foreign Trade public sector shall be supported and the efficiency of these organizations shall be promoted and the private sector shall be assisted to increase export in the permitted fields, especially non essential commodities.

13. Non governmental trade operations shall be effectively encountered, being not in our favour and the waste of money on luxuries and unnecessary services abroad shall be curtailed.

../..

14. The position of the country shall be modified within the framework of Arab and international division of labour through conclusion of long term trade agreements, being one of the tools to reduce the deficit and a serious study of the possibilities for the realization of joint development projects in conjunction with certain Arab countries shall be made.

15. Export shall be encouraged by all possible means and a special measure may be introduced for plants in whole or in part to produce goods for export, and to pay a special concern to their technical specifications, cost and marketing.

16. The possibilities with reference to the circumstances prevailing in the country shall be mustered, especially in the field of services to relax sharp trade deficit and consequently deficit in payments balance.

17. Transport and carriage sector shall be developed in a manner appropriate to the position of our country as a knot of communications between many countries.

18. A special concern shall be given to tourist organizations, tourist areas and summer resorts and tourism shall be encouraged by introducing at first easy and effective means and later on costly means.

19. Benefit from transfer payments shall be promoted through maintaining relations with Syrian immigrants and facilitating their visit to their homeland and information service to them shall be promoted .

20. Material incentive system shall be introduced into organizations with a view inter alia to increase the participation of these organizations to raise the volume of foreign currency flugs and to the country through the promotion of export and minimizing their demand of foreign currency to meet their import. This will serve to increase the profit of these organizations in their commercial business transactions which will favourably reflect on the balance of payments.

21. Training courses shall be arranged for the personnel of foreign trade organizations. This will serve to train them on foreign trade planing procedures and give them a minimum education of trade knowledge.
